Memphis, TN | Open to Relocation | +1 513-488-0840 | sainadhareddypenugonda@gmail.com | [linkedin.com/in/sainadh5011](https://www.linkedin.com/in/sainadh5011)

SUMMARY

Software Engineering Advisor with 5+ years of experience building Java and Spring Boot backend services, REST APIs, and enterprise applications on AWS. Experience spans microservices, Kafka integrations, Camunda workflows, and PostgreSQL and MongoDB databases, from design through deployment and production support. Also builds production AI applications using Python, FastAPI, RAG, and LLM APIs, with ownership of major releases and deployment.

TECHNICAL SKILLS

- **Languages:** Java 11/17, SQL, Python
- **Backend & Integration:** Spring Boot, REST APIs, Microservices, JPA/Hibernate, GraphQL, Apache Kafka, Camunda BPM
- **Databases:** PostgreSQL, MongoDB, MySQL, DynamoDB, Redis
- **Cloud & DevOps:** AWS, GCP, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD
- **Security, Testing & Monitoring:** OAuth 2.0, JWT, Role-Based Access Control (RBAC), JUnit, Mockito, Postman, Splunk
- **AI Engineering:** FastAPI, OpenAI APIs, Amazon Bedrock, Retrieval-Augmented Generation (RAG), LangChain, LangGraph, LangSmith, Prompt Engineering, Vector Databases
- **Frontend:** React, JavaScript, TypeScript, HTML5, CSS3

EXPERIENCE

Evernorth Health Services

Jun 2025 - Present

Software Engineering Advisor

Memphis, TN

- Owned delivery of Java 17 and Spring Boot backend features on AWS, working with stakeholders from requirements and design through production deployment and support.
- Built Python and FastAPI services for agentic AI workflows using LangGraph and Amazon Bedrock; contributed to application design and development and owned major releases and production deployment.
- Developed REST APIs and Camunda workflow integrations for healthcare applications, implementing authentication, authorization, and data protection controls.
- Integrated microservices through Apache Kafka and asynchronous messaging to decouple services and support enterprise workflows.
- Developed an internal RAG chatbot using OpenAI APIs, LangChain, and vector databases to help employees retrieve enterprise knowledge and automate routine tasks.
- Developed PostgreSQL and MongoDB integrations, contributed to database upgrades, and investigated production issues using Splunk logs.
- Deployed and supported containerized services on AWS using Docker, Kubernetes, and CI/CD pipelines.
- Added unit and integration tests with JUnit and Mockito and validated APIs with Postman to verify backend changes before release.

University of Cincinnati

Jan 2024 - Jun 2025

Software Engineer

Cincinnati, OH

- Built backend services and REST APIs using Java 17 and Spring Boot, optimizing SQL queries to improve database access and API performance.
- Implemented API authentication, authorization, and secure data exchange between frontend applications and backend services.
- Developed data processing workflows for structured and unstructured datasets to support AI/ML experimentation, analytics, and reporting.
- Integrated JUnit and Mockito tests, Cypress checks, and Postman API validation into CI/CD workflows to verify changes before deployment.
- Built reusable React components using Hooks and Context API, connecting user interfaces to backend services through REST APIs.

Cognizant Technology Solutions

Mar 2022 - Aug 2023

Programmer Analyst Trainee

Hyderabad, IN.

- Developed Java and Spring Boot microservices and REST APIs for enterprise applications and service integrations.
- Implemented Camunda BPM workflows to automate business processes and coordinate backend services.
- Integrated REST and SOAP web services, handling XML and JSON payloads for communication between enterprise applications.
- Supported Java/J2EE applications on Linux by investigating production logs, troubleshooting issues, and validating fixes with Postman.
- Added JUnit unit and integration tests to verify backend functionality within CI/CD pipelines.
- Updated internal React dashboards, fixing UI defects, error handling, and backend API integration issues.

Squaricle Intelli Solutions

Web Developer

Jan 2021 - Feb 2022

Remote

- Built Spring Boot backend services and REST APIs integrated with MySQL and DynamoDB to support application data access and frontend functionality.
- Developed React interfaces with reusable components, state management, and shared API utilities.
- Automated backend and UI tests using JUnit, Jest, and Cypress; validated REST APIs with Postman.
- Deployed full-stack features through CI/CD pipelines using Docker and Kubernetes.

CERTIFICATIONS

- Claude Certified Associate – Foundations | Anthropic | [Verify Credential](#)
- AI Agents Fundamentals | Hugging Face

EDUCATION

University of Cincinnati

M.S., Information Technology

Aug 2023 - Dec 2024

- **GPA:** 3.9/4.0
